This is the recipe main page. On the right hand of the page, you will see a label saying, "You can enter the recipe name." Underneath this label there will be a text box for the user to enter the recipe name. on the right-hand side of the page will also show two buttons and

add recipe details button where it will take the user to a add recipe ingredient page where the user can populate the recipe with details and then underneath that button will also be a save the recipe button which will save the recipe the user has created. Remember to first create the recipe details before saving the recipe and adding a name to the recipe. On the left-hand side of the page there will be two text boxes labeled to filter the recipe by an ingredient and to filter the recipe by maximum number of calories, this is where the user will enter either the ingredients, they want to filter the recipes by or the maximum number of calories. Underneath these options is a list box that will display all the recipes the user created, and they can select from them. Once the user selects from these recipes, the user can scale the recipe by choosing one of the following options of the combo box labeled scale recipe and having options like doubling it or tripling it the recipe scale and following this by the user pressing the scale button. The user can also reset all the recipes by a reset button. The user can also select a button which says “Display recipe” which will display the recipe details for the selected recipe that the user has chosen from the list box located in the left-hand side of the page. Underneath the display button for the recipe details, there is a filter recipe option by the food group which will also display food group options in the combo box which will allow the user to filter the recipes by the selected food group. The user can then scale and filter the recipe according to their needs by fulfilling their desired criteria. A black button saying “Exit” will allow the user to exit the recipe app (Simmons, 2024).

The screenshot shows a web application window titled "RecipeMake". The interface is designed for creating recipe ingredients and steps. It features a series of input fields for the following information:

- Enter Ingredient Name:
- Enter Quantity:
- Enter Measurement Unit:
- Enter Calories:
- Enter Food Group:

Below these fields is a section titled "Steps:" in a blue box. Underneath this title are four buttons: "Add the Step", "Delete the Step", "Save the Steps", and "Cancel". At the bottom of the form is a large, empty rectangular box, likely intended for displaying the details of the selected recipe or step.

This is the ingredient and step creating page, where the user can create ingredients such as ingredient name, quantity, measurement unit, calories, food groups and recipe steps.

The user can add multiple amounts of steps, and tailor the steps by deleting undesired steps and then saving the desired steps. The user can press the cancel button which will cancel this process (Simmons, 2024).
